## PROFESSIONAL SUMMARY

Software Engineer with full-stack development experience and strong problem-solving skills. Proficient in Python, Java, JavaScript, and modern web frameworks. Experience in full-stack development, API design, and system optimization, and building AI integrated applications. Currently pursuing Master's in Software Engineering at University of Maryland, College Park.

## EDUCATION

### University of Maryland, College Park

College Park, MD

Master's in Software Engineering

Aug. 2025 – May 2027(Expected)

- **Relevant Coursework:** Software Engineering, Software Testing & Maintenance, AI based Software Systems, Fundamentals of AI and Deep Learning, Software Design and Implementation

### Vellore Institute of Technology

Vellore, India

Bachelor of Technology in Computer Science and Engineering | CGPA: 9.06

Aug. 2020 – May 2024

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Design and Analysis of Algorithms, Operating Systems, Database Management Systems, Software Engineering, Internet and Web Programming, AI and ML

## SKILLS

**Languages:** Python, Java, C/C++, DB (Postgres, MongoDB, MySQL), JavaScript, HTML/CSS, R

**Frameworks and Libraries:** React, Node.js, Django, ExpressJS, Bootstrap, Pandas, NumPy, Matplotlib, OpenCV, Scikit-learn

**Tools and Platforms:** Git, JIRA, Microsoft Azure, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

**Operating Systems:** Windows, Linux(Ubuntu)

## WORK HISTORY

### Technical Analyst, Endur/Findur and Allegro

Jan 2024 – July 2025

ION Group

Bengaluru, India

- Developed automation scripts to restore databases for internal use, **reducing process time from days to hours**
- Optimized system workflows and troubleshooting processes, improving **operational efficiency by 30%** and reducing issue resolution time by 20%
- Resolved **200+ client issues** on **Openlink and Allegro** platforms, maintaining **4.5+/5.0 client satisfactory rating**.
- Collaborated with development teams to identify system bottlenecks and implement performance improvements
- Created technical documentation and process workflows for complex trading system configurations
- Analyzed system logs and performed root cause analysis for critical production issues

### Software Development Intern (Remote)

May 2023 – July 2023

ISRO Liquid Propulsion Systems Centre

Bengaluru, India

- Developed image segmentation solution using computer vision algorithms, reducing manual inspection time by 25%
- Implemented Canny edge detection algorithm achieving 94% accuracy in defect identification
- Built anomaly detection system that identified 150+ critical issues, improving system reliability by 40%
- Collaborated with engineering teams to integrate ML models into existing inspection pipeline

## PROJECTS

### Food Waste Management System | HTML, CSS, Javascript, ExpressJS, Git

Sept 2021 – Dec 2021

- Implemented RESTful APIs for user authentication, donation tracking, and inventory management
- Developed full-stack web application connecting restaurants and NGOs to reduce food waste
- Implemented **role-based access** for donors, NGOs, and admins using **secure login and session management**.
- Automated **reporting and alerts** for food expiry and pickup schedules, increasing **system reliability** and stakeholder coordination. [Github](#)

### Image Enhancement Using Exposure Fusion Framework | Python, OpenCV, NumPy

Jan 2023 – April 2023

- Enhanced low-light images by modifying an **exposure fusion framework**, boosting **PSNR by 3.7%**, **SSIM by 3%**, and reducing **Brisque Score by 4.7%**.
- Implemented **OpenCV Canny edge detection** to preserve image details and sharpness.
- Improved **exposure ratio calculation** using **arithmetic mean** for clearer, balanced brightness.
- Built modular Python framework with configurable parameters for different lighting conditions [Github](#)
